Vacuum Robotic Arms

Robotic Components
HA-3.2 Vacuum Robotic Arms

Robotic Components

FEATURES
- High reliability of > 3 million MCBF
- 2-axis motion control
- Payload up to 4.5kg
- Standard and custom size arm segments
- Standard and custom end effectors (single or dual)
- Compact design including integrated controller
- RS-232 / Ethernet control interface
- CE/S2 compliant
- High vacuum compatible
- Class 1 cleanroom compatible

OPTIONS
- Arm Segments Sizes
- Single and Dual End Effectors
- Custom payloads above 4.5kg
- Custom substrate sizes

Hine Automation’s Vacuum Robotic Arms are the next generation Vacuum SCARA Robots. Designed as an entry level product, the HA-3.2 Vacuum Robotic Arm offers “straight-line” horizontal motion in an economic package. The HA-3.2 is a perfect fit for budget sensitive projects where no vertical travel is required. With its proprietary drive mechanism, the HA-3.2 has the appropriate accuracy and repeatability to become the central handler of any vacuum cluster system. Arm segments and end-effectors can be easily customized to be compatible with nearly any material cassette or process module configuration. For applications where vertical motion is required, Z-travel can be added prior or post installation.
**HA-5.0 Vacuum Robotic Arms**

**Robotic Components**

**FEATURES**
- High reliability of > 3 million MCBF
- 3-axis motion control
- Pay load up to 4.5kg
- Standard and custom size arm segments
- Standard and custom end effectors (single or dual)
- Compact design including integrated controller
- RS-232 / Ethernet control interface
- CE/S2 compliant
- HA-5.0 is the best replacement for the Hine Design robotic arm model 4.5
- High vacuum compatible
- Class 1 cleanroom compatible

**OPTIONS**
- Arm Segments Sizes
- Single and Dual End Effectors
- Custom payloads above 4.5kg
- Custom substrate sizes

---

Hine Automation's Vacuum Robotic Arms are the next generation Vacuum SCARA Robots. Designed as the central handling robot for Hine’s Constellation systems, the HA-5.0V can be integrated with any vacuum cluster system. Arm segments and end-effectors of the HA-5.0 can be easily customized to meet nearly any OEM requirement. Thanks to its ferrofluidic rotary seals, harmonic drive brushless DC motors, and high strength undercarriage, the HA-5.0 Vacuum Robotic Arm transfers substrates with high precision and repeatability within high vacuum environments. The HA-5.0 features identical command sets and form factor as the vacuum robotic arm manufactured previously by Hine Design® and can be used as a replacement for the 4.5 model.

About Hine Automation

Hine Automation, LLC is a designer and manufacturer of automation systems and robotic components. We serve Original Equipment Manufacturers (OEMs) in the semiconductor, solar, flat panel display and related industries across the globe. Our robotic components satisfy a wide range of needs; from flexible research and development environments to stringent manufacturing environments. Combining our unsurpassed quality and reliability with modular and versatile designs to meet today's automation challenges, our products provide functional and economical solutions.

Our Mission

Our goal is to design and manufacture the most cost effective automation solutions and deliver unparalleled customer service and support.

Our Strengths

- Demonstrated Reliability
- Cost Effective Solutions
- Custom Solutions
- Lightning Speed Response and Turn-around Times
- Knowledge, Experience-driven Designs

Our Products

- Cluster Systems: Constellation Systems
- Automated Load Locks: Star Systems
- Robotic Components: Vacuum Robotic Arms, Vacuum Elevators, Vacuum Aligners, Atmospheric Robotic Arms, Atmospheric Elevators, Atmospheric Aligners
